EDUCATION

Manipal University Jaipur 2021 - 2025
Bachelor of Technology in Computer and Communication Engineering Jaipur, India
CGPA: 9.62, Dean's List 2022-2025

St. Thomas English Medium School 2018 - 2020
Senior Secondary School Meerut, India
Grade: 96.5%

WORK EXPERIENCE

Cigna Healthcare Oct 2025 - Present
Application Development Associate Analyst Bengaluru, India

- Develop and support enterprise healthcare applications using C#, .NET, SQL Server, React, and document/workflow technologies, contributing across development, configuration, testing, deployment support, and production troubleshooting.
- Implemented and tested ASP.NET Core Web APIs with Entity Framework Core, layered controller-service-repository design, DTOs, audit logging, Identity/JWT authentication, role-based authorization, and xUnit/Moq unit tests.
- Drive production troubleshooting and monitoring improvements through application and workflow log analysis, data/configuration investigation, Splunk alert tuning, and coordinated incident resolution.

EPAM Systems Jan 2025 - June 2025
Software Engineering Intern Hyderabad, India

- Designed automated CI/CD pipelines using Azure DevOps and Terraform, reducing manual deployment effort by 80% and enabling version-controlled infrastructure delivery.
- Worked with Docker containers and Azure Kubernetes Service, and configured Azure compute, networking, storage, databases, IAM/RBAC, and monitoring in collaborative DevOps workflows.

Dell Technologies May 2024 - July 2024
Undergraduate Intern Bengaluru, India

- Extracted, cleaned, transformed, and validated workflow-management data from the Dell Data Lake to improve consistency between backend and frontend data sources.
- Designed SQL views and tables and developed an interactive dashboard that presented stakeholder-aligned operational metrics and improved data visibility.

PROJECTS

InsureOne - Insurance and Payments Management Platform

- Developed a full-stack insurance servicing platform using ASP.NET Core and React to simplify policy, claims, and payment management, providing users with a centralized interface for core insurance operations.
- Designed secure, role-based workflows with JWT authentication and validation to protect sensitive operations, prevent unauthorized access, and improve data reliability across customer-facing transactions.

Automated PR Documentation Workflow

- Automated post-development documentation to reduce repetitive manual updates and ensure engineering changes were consistently captured whenever pull requests were merged.
- Integrated GitHub, AI-based summarization, and Confluence through n8n to generate concise, standardized documentation containing Jira/story references, change summaries, authors, reviewers, and PR details, improving documentation consistency and traceability.

ReadToReel - EPAM Future Forge Hackathon

- Integrated SadTalker, enabling automatic generation of AI avatar videos that narrated summaries derived from input documents.
- Developed the pipeline to convert document summaries into speech and synced them with animated facial motion, delivering a visually engaging narration experience.

Heart Health Predictive ML Application

- Developed a Streamlit-based ML web app for real-time heart disease risk prediction, achieving 94% accuracy using optimized Random Forest and Gradient Boosting models.
- Enhanced model performance through data preprocessing, feature engineering, and hyperparameter tuning with GridSearchCV on a dataset of 1,025 records.

TECHNICAL SKILLS

Languages: C#, SQL, Java, Python, JavaScript, React, Shell Scripting
Developer Tools: Linux, ASP.NET Core, JWT, REST APIs, xUnit, Moq, SQL Server, Oracle, ThoughtSpot, Jupyter Notebook, OnBase, Splunk, ServiceNow
Cloud & DevOps: Microsoft Azure, Azure DevOps, Docker, Kubernetes, Terraform, CI/CD, Git/GitHub
Libraries: Pandas, NumPy, Scikit-learn, Streamlit, PyTorch, TensorFlow, LangChain
